

## **FACT SHEET: MTA Precautionary Measures Against Coronavirus (COVID-19)**

### MTA-wide

MTA trains and buses are already cleaned daily, with disinfectant sanitizing performed on an as-needed basis. Starting March 2, daily disinfectant sanitizing began in order to cover the full fleet every 72 hours

- Frequently used surfaces in stations such as turnstiles, MetroCard and ticket vending machines, slam gates, stair and escalator handrails, benches, elevator buttons, door knobs/handles, ticket counters, biometric clocks in waiting rooms and employee areas, any remaining payphones
- Commuter rail stations also include
  - Parking meters if in immediate station plaza area
  - Platform waiting rooms
- Inside trains and buses -- seats, poles, grabrails, engineer cab consoles, door control panels and intercom buttons
- Commuter rail cars also include
  - All hand rails, railings and grab irons between head rests
  - Front of luggage racks and handles
  - Bathroom sink tops, grab rails, trash bin covers, flip down seats, flush button
- All cleaning agents are EPA-approved and CDC-endorsed disinfectants

### NYC Transit

- **427** subway stations disinfected with remaining **45** to be completed tonight
- **1,905** subway cars disinfected with remaining **4,709** to be completed in 72 hour-period
- **1,974** buses sanitized with **1,900** more to be sanitized tonight. **5,700** bus cleanings will be completed in 72-hour period
- **1,341** Access-a-Ride vans disinfected
