

March 21, 2017

Vincent Sapienza, Acting Commissioner  
New York City Department of Environmental Protection  
59-17 Junction Boulevard  
Flushing, NY 11373

**Re:** Oakwood Beach Waste Water Treatment Plant  
Port Richmond Waste Water Treatment Plant

Dear Acting Commissioner Sapienza:

I hope this letter finds you well.

In a letter dated January 24, 2017, I inquired about the capacity of the above referenced treatment plants, and their ability to handle both the commercial and residential development that is taking place on a large scale on Staten Island's North Shore. I have enclosed a copy of that letter.

Since I have not yet received a reply, I am writing to once again ask you if these plants have sufficient remaining capacity to accommodate these large projects.

Thank you for your kind attention, and I await your response.

Sincerely,

James S. Oddo  
President, Borough of Staten Island

Enclosure
